Overview

The Cloud Credit Connector (C3) acts as an interface between StreamOne ION applications and various ERP systems.

It allows the business operations staff and credit teams to review and manage orders coming from StreamOne ION, especially in cases where an automatic approval is not applied due to countryspecific or ERP-specific rules.

By allowing auto approval, manual approvals or rejections of such orders, Cloud Credit Connector (C3) ensures that only validated requests are sent to vendors for provisioning, thereby maintaining control and accuracy in the order processing workflow.

Features of the Cloud Credit Connector dashboard:

- Connects StreamOne ION with multiple ERP systems for dummy order check.
- Supports auto approval, auto approval with rules, and manual approval or rejection of orders from StreamOne ION.
- Supports country-specific and ERP-specific approval logic.
- Ensures provisioning validated orders to ERPs.
- Maintains accuracy and control in order processing.
- Streamlines the communication between business operations and ERP systems.
- Allows users to define and track custom metrics that are critical to their business operations.

About this document

This document provides detailed information about the key components of the Cloud Credit Connector - Business Operations Hub, including the Rules Engine dashboard.

It explains the purpose and functionality of each module, offering systematic guidance on how to use them effectively.

This guide helps users understand how these tools work together to support business operations, streamline workflows, and enhance decision-making.

Getting Started

This section includes the following topics.

- [Obtain access to the environment](#)
- [Sign in to the Cloud Credit Connector dashboard](#)

Obtain access to the environment

Ensure that you have obtained permission to access the corresponding dashboard of the Cloud Credit Connector application of StreamOne Hub.

The Cloud Credit Connector includes the following environments.

Environment	Web address
PROD	https://streamone-hub.tdsynnex.org

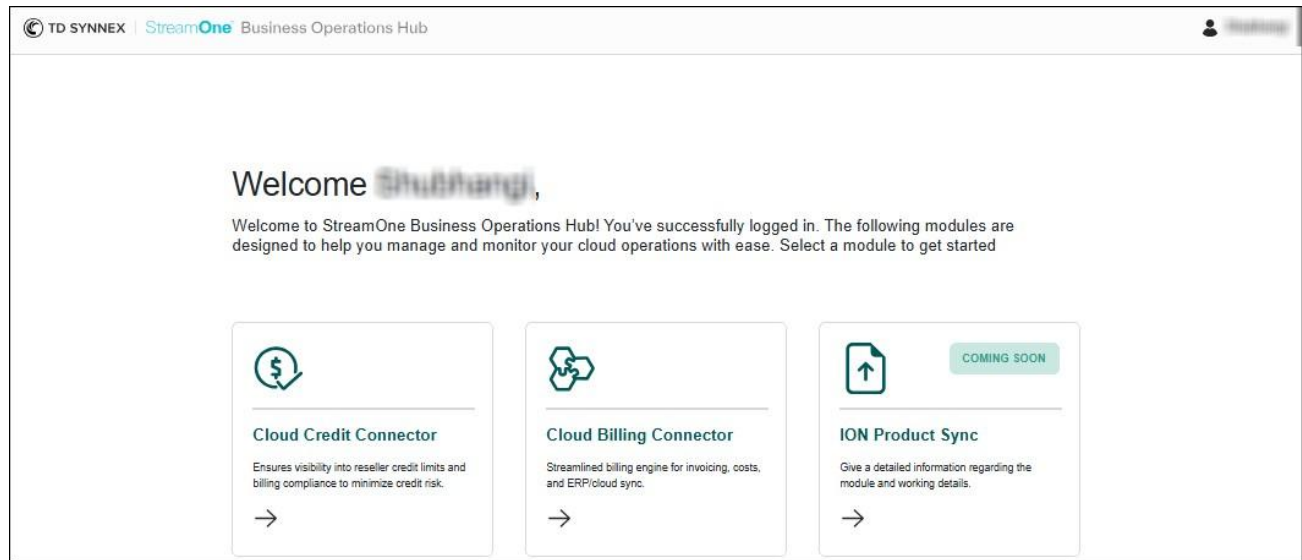

Sign in to the Cloud Credit Connector dashboard

Ensure that you have obtained the required permissions to access the corresponding dashboard on the Cloud Credit Connector dashboard.

To sign in to the Cloud Credit Connector dashboard, perform the following steps.

- 1. In the browser enter, <https://streamone-hub.tdsynnex.org>.

The StreamOne Business Operations Hub page is displayed.

- 2. Click **Cloud Credit Connector**.

The **Cloud Credit Connector** dashboard is displayed.

Note: When you click the **Cloud Credit Connector** application, if you do not have the required permissions, the **Restricted Access** dialog box is displayed along with a link that navigates to a document explaining how to create an EasyVista ticket. The error message varies according to the permissions.

Viewing components of Cloud Credit Connector Dashboard

The following table includes the filters of the Cloud Credit Connector dashboard.

Image	Name	Description
	Date Range	Displays the orders that are awaiting action such as <i>approve</i> or <i>decline</i> .
	Search	Allows you to search for the order number.
	Add Filter	Displays filter details. Select the required options from the <i>Country</i> , <i>Approval</i> , or <i>Order Value</i> tabs and click Apply . 

The following table includes the tabs and columns of the Cloud Credit Connector dashboard.

Name	Description
Needs Approval	Displays the orders that are awaiting action such as <i>approve</i> or <i>decline</i> .

Approved	Displays the approved orders. In the Approved Details column of the Approved tab, the date and time stamp when the order was approved along with the approval type (Auto/ERP) are displayed. Approved Details A 07 Aug, 2025 09:20 AM PPC Auto Rule M 07 Aug, 2025 09:17 AM E 07 Aug, 2025 08:21 AM Erp Approved
Declined	Displays the declined orders. The Decline Details column of the Declined tab displays the following details: Decline Details A 07 Aug, 2025 09:18 AM PPC Auto Rule - Order declined date - Time stamp - Approval type
Order Details	Displays the following order details: S880281933 19 Aug, 2025 09:33 AM - Order number in StreamOne ION - Order creation date - Time stamp
Reseller Details	Displays the reseller ID and name. 325009 BIT Service Reseller
Country	Displays the country where the order is placed.
Currency	Displays the currency that is configured in the StreamOne ION platform.
Order value	Displays the total amount of the order.

Name	Description
Unbilled Usage	Displays usage data that has been recorded but not billed to the customer.
Actions	 Displays the action icons. □ To approve an order, click the  icon in the respective row. The approved orders are provisioned to the vendor and displayed on the Approved tab. When you click the  icon, a confirmation message is displayed. Order S880243303 has been approved × □ To decline an order, click the  icon in the respective row. The declined orders are displayed on the Declined tab. When you click the  icon, a confirmation message is displayed. Order S880356081 has been declined ×

Viewing Cloud Credit Connector Approval Types

The following approval types are included.

- [Dummy Order Flow \(DOF\) Approval](#)
- [Auto](#)
- [Auto with Rules](#)

Dummy Order Flow (DOF) Approval

Orders approved within the ERP system require no manual intervention, as the approval process is fully automated and triggered by purchase requisitions.

Auto

Auto-approved orders do not integrate with the ERP system. The Cloud Credit Connector (C3) system automatically approves all orders using this configuration and sends them back to the StreamOne ION platform, without connecting to the ERP system.

Auto with Rules

This approval type functions like 'Auto rule' where the order does not connect to the ERP system. However, specific approval rules are applied. If the conditions are satisfied, users can approve or decline the order. Manual approval is required only when the system cannot automatically approve the order.

Viewing the Rules Engine

The Rules Engine functions as a black box that evaluates a list of rules against entities to determine whether the entities are compliant. This integration of the Rules Engine enhances automation and streamlines the approval process for initial orders. The engine evaluates and executes orders according to predefined business logic, allowing admins to configure and update business rules through a user-friendly interface without developer assistance. This approach reduces manual intervention, expedites approvals, and ensures compliance by adhering to preset rules.

This section includes the following topics.

- [Reseller Level](#)
- [Country Level](#)
- [Country Region Level](#)

- [Global Level Rules Engine](#)

Prerequisite: Orders must be placed from the StreamOne ION platform, and rules are configured in the backend.

Reseller Level Rules Engine

A rule is set at the reseller level where the Cloud Credit Connector dashboard displays the status of orders.

Rule Condition	Reseller's Country	Expected Action	Result
Amount less than 133 DKK	DKK	The rule condition is met for auto approval, and manual approval is not required.	The order is auto approved and is displayed in the Approved tab.
