Overview

Using the **Revenue Dashboard**, you can track the cloud business performance from a single place. It shows your revenue, usage, and billing data across different cloud providers and customers. It helps Billing Operations team to view trends, compare data over time, and download reports to help with decision-making.

About this document

This document provides step-by-step instructions to understand and navigate through the Revenue Dashboard. Key features include navigation, tools for tracking and analyzing the cloud revenue. You can interpret key data to monitor cloud revenue, track usage, and support business decisions.

This document also highlights the use of the built-in AI Assistant, which helps users to quickly find information, obtain answers to common questions, and simplify complex tasks through intelligent suggestions and interactive support.

Getting Started

This section includes the following topics.

- [Obtain access to the environment](#)
- [Sign in to the Revenue Dashboard page](#)

Obtain access to the environment

Ensure that you have obtained permissions to access the corresponding dashboards of StreamOne Insight.

The Revenue Dashboard includes the following environment.

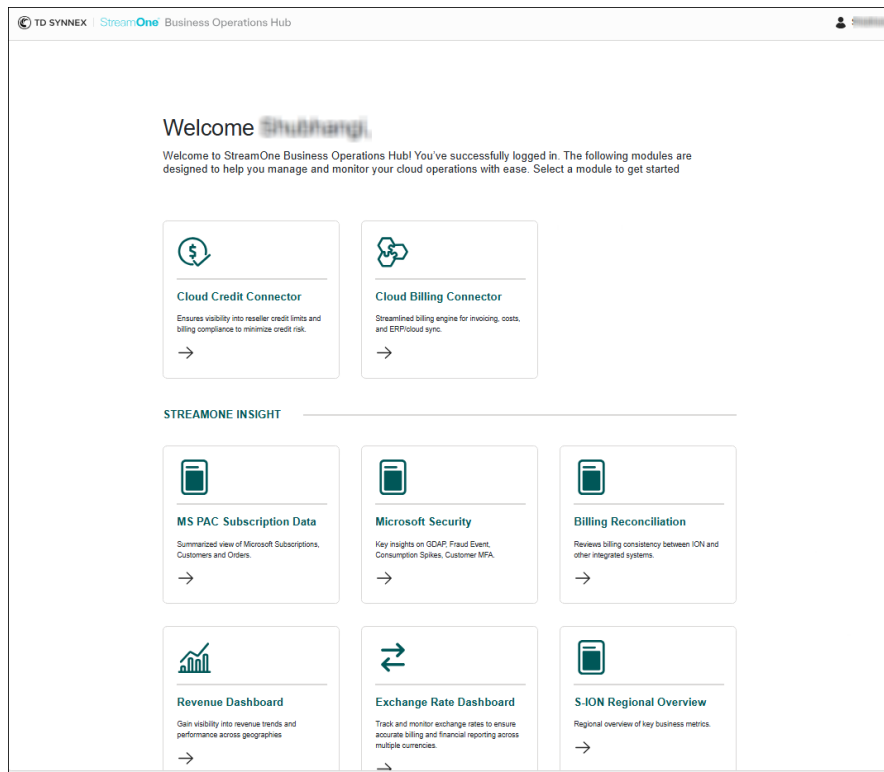

Environment	Web address
PROD	https://streamone-hub.tdsynnex.org

Sign in to the Revenue Dashboard page

To sign in to the Revenue Dashboard page, perform the following steps.

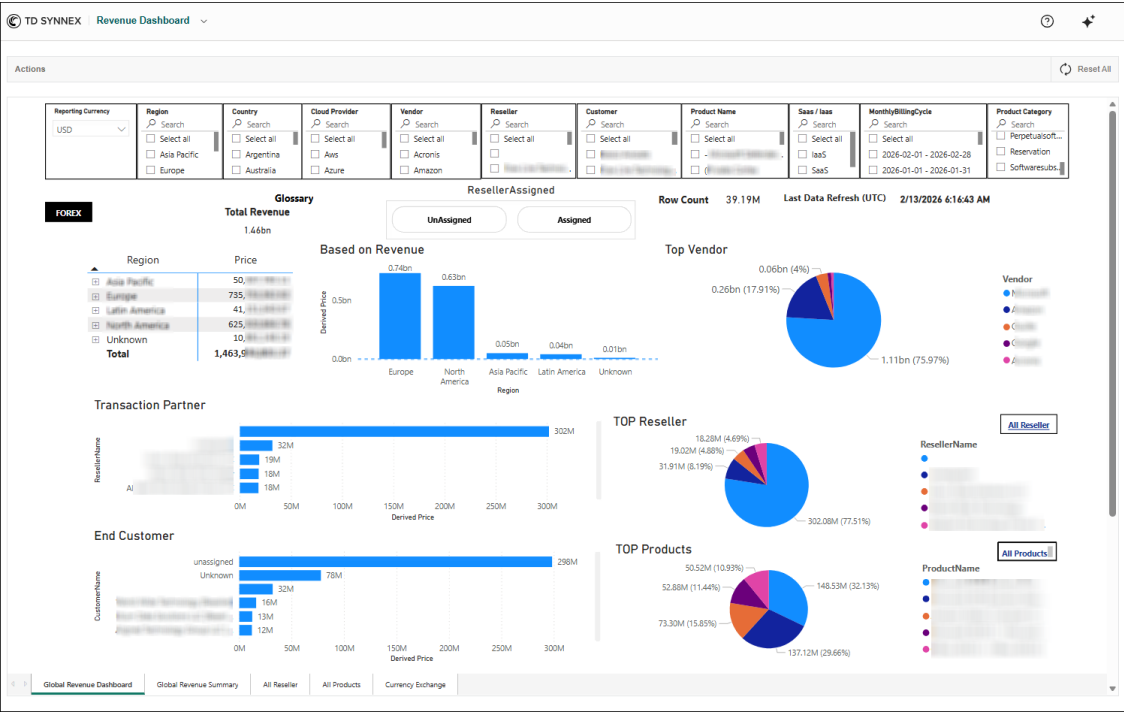

1. In the browser, enter <https://streamone-hub.tdsynnex.org>.

The **StreamOne Business Operations Hub** page is displayed.

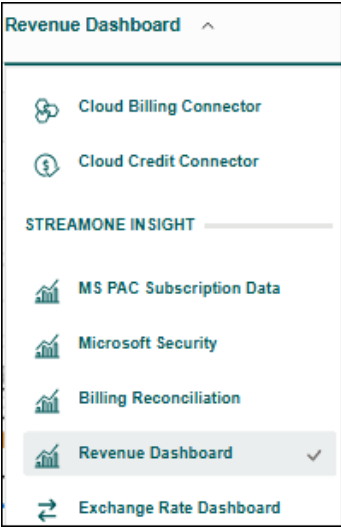

2. In the **STREAMONE INSIGHT** section, click **Revenue Dashboard**.

The **Revenue Dashboard** page is displayed.

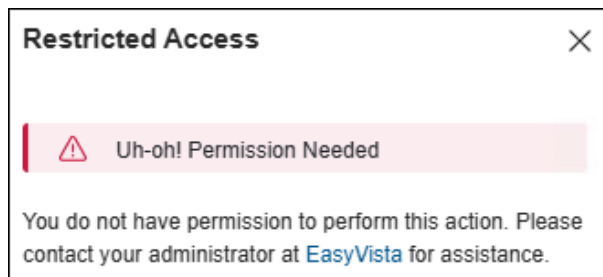

- On the **Revenue Dashboard** page, by default the **Global Revenue Dashboard** tab is displayed.
- On the **Revenue Dashboard** page, at the top-right you can view and access the AI Assistant  icon.
- To view unfiltered data of a dashboard, at the top-right, click the **Reset All** button.
- To access the other dashboards, click the Revenue Dashboard drop-down  icon.

Key features of the Revenue Dashboard are as follows:

- **User-Friendly Interface:** Provides a user-friendly interface that requires no technical skills.
- **Global Revenue View:** Specifies global revenue across all customers, providers, and regions in one place.
- **Interactive Filters:** Includes filters to view data for a specific customer, provider, or region.
- **Visual Charts and Graphs:** Displays trends and patterns quickly with clear, easy to read visual charts and graphs.
- **AI Assistant:** Provides instant help using the inbuilt AI Assistant to ask questions, find data, and get suggestions.
- **Real-Time Data:** Provides access to real time data on revenue and usage, without waiting for reports.
- **Multi-Currency Support:** Allows to view and manage revenue in various currencies for global operations.

Note: When you click the **Revenue Dashboard** application, if you do not have the required permissions, the **Restricted Access** dialog box is displayed along with a link that navigates to a document to create an EasyVista ticket. The error message varies according to the permissions.

Viewing filtered results

You can view filtered results for the following tabs.

- [Global Revenue Dashboard filtered results](#)
- [Global Revenue Summary filtered results](#)
- [All Reseller filtered results](#)
- [All Products filtered results](#)
- [Viewing Currency Exchange](#)

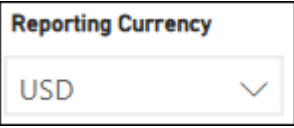

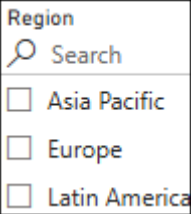

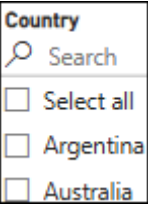

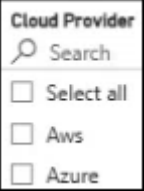

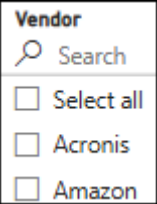

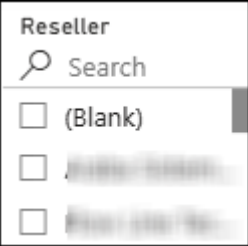

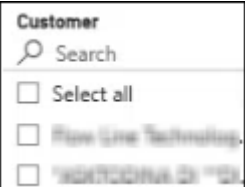

The **Global Revenue Dashboard** provides a comprehensive view of business performance, including revenue, margins, and other key financial metrics, across various regions and time periods. You can easily identify trends and make strategic decisions.

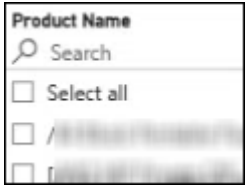

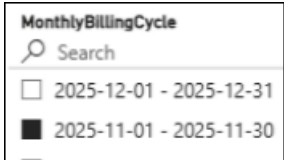

- The **Global Revenue Dashboard** displays detailed information for the top five vendors, resellers, and products.
- You can access a table displaying the selected region and its price details.
- Selecting the **ALL Resellers** link displays the complete list of reseller details.
- Selecting the **ALL Products** link displays the complete list of product details.

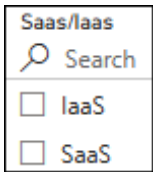

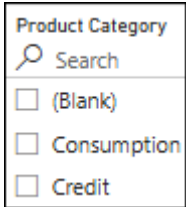

Note: When you log in to the **Revenue Dashboard**, by default, data for the current login date is displayed.

The following table includes the filters that are common to all the Global Revenue dashboards.

Filter	Filter Name	Description
Reporting Currency 	Reporting Currency	Displays the records for the selected currency.
Region 	Region	Displays the records for the selected region such as Asia Pacific, Europe, and so on.
Country 	Country	Displays the records for the selected country.
Cloud Provider 	Cloud Provider	Displays the records for the selected cloud provider's name.
Vendor 	Vendor	Displays the records for the selected vendor.
Reseller 	Reseller	Allows you to filter the results according to the reseller.
Customer 	Customer	Displays the records for the selected customer.

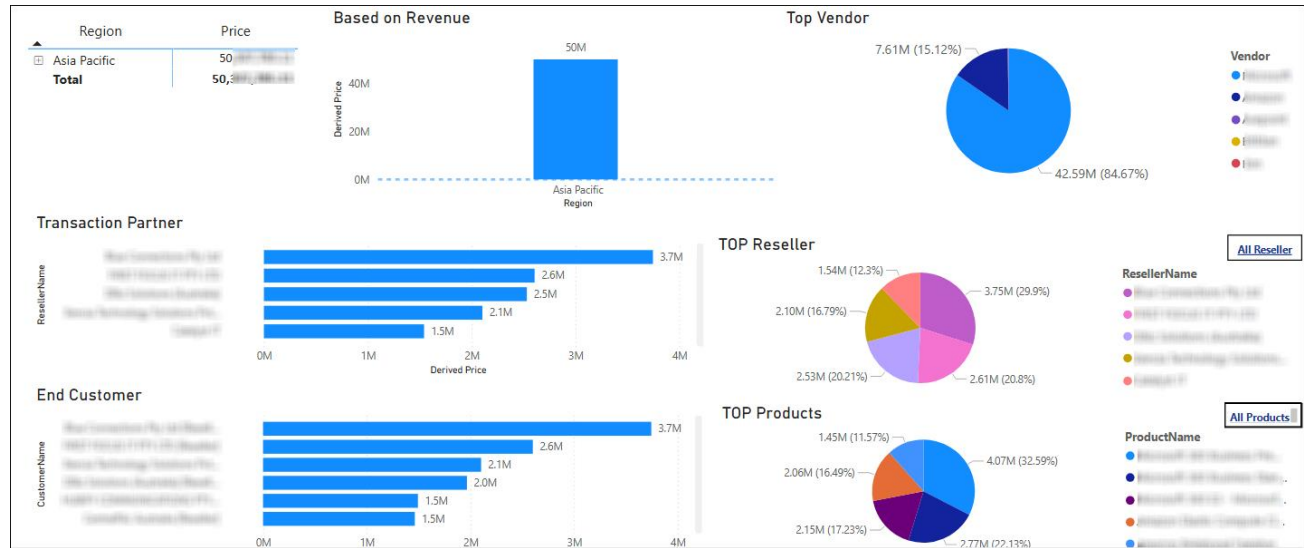

Filter	Filter Name	Description
	Product Name	Displays data for the selected product.
	MonthlyBilling Cycle	Allows you to view the billing data for specific months.

The following table includes the filters specific to the Global Revenue Dashboard.

Filter	Filter Name	Description
	Saas/laas	Displays billing data for IaaS and SaaS.
	Product Category	Allows you to filter the results according to the product category.
	Reseller Assignment	Displays subscriptions for which reseller is assigned and subscriptions for which reseller is unassigned.

Global Revenue Dashboard filtered results

On the **Global Revenue Dashboard** tab, you can access real-time analytics and reporting, and monitor revenue, margins, and other key performance indicators (KPIs) effectively.

According to the selected filters such as region, country, vendor, you can view revenue details as follows:

- Visual summaries of key metrics, including the top five products, top five resellers, and vendor information.
- Hyperlinks in both the **Top Products** and **Top Resellers** sections allowing you to navigate to detailed reference datasets for deeper analysis.
- The updated user interface loads smoothly and supports efficient navigation throughout the dashboard.
- All interactive elements, such as filters, buttons, and sortable columns function reliably across applicable pages, ensuring accurate and convenient data exploration.
- The **Transaction Partner** graph displays revenue details for the top 5 resellers, to view more details, scroll down.
- The **End Customer** graph displays revenue details for the top 5 end customers, to view more details scroll down.

Global Revenue Summary filtered results

The **Global Revenue Summary** tab provides a detailed summary according to the filters selected on the **Global Revenue Dashboard** tab, such as region, country, vendor, and so on. This view provides a high-level summary of revenue, margins, and other key financial metrics across various regions and time periods.

You can view the total revenue generated in the selected period, and highlight the regions contributing the most overall revenue.

Revenue and Gross Profit by Region and Month																
Region	Derived Price		GrossProfit													
RegionGroup1	50,381,000.00		-1,811,000.00

Total					735700000

Viewing Currency Exchange

The **Currency Exchange** tab helps finance teams and resellers understand the revenue performance and the currency exchange rate in their local currency, making it easier to analyze margins and profitability.

This tab uses the **Source Currency** (the currency in which the original transaction occurred) and the **Reporting Currency** (the currency selected for viewing or reporting purposes) to determine the correct conversion rate for each transaction.

Based on this exchange rate, all financial values are automatically converted from their original currency into the selected reporting currency.

These converted values are then displayed across all visuals, tables, and metrics within the Global Revenue Dashboard, ensuring that the revenue data remains accurate, consistent, and easy to compare across various regions and markets.

SourceCurrency	Reporting Currency	MonthlyBillingCycle
DKK	USD	Search ☒ Select all ☐ 2026-02-01 - 2026-02-28 ☒ 2026-01-01 - 2026-01-31
SourceCurrency	TargetCurrency	ConversionRate
DKK	USD	0.16

Key features of Currency Exchange

- Multi-Currency Support:** Allows users to view and manage revenue in different currencies, supporting global operations.
- Billing Accuracy:** Ensures that invoices and revenue summaries are aligned with the correct exchange rates, improving understanding and preventing errors.

Managing AI Assistant Dashboard

The AI Assistant is designed to streamline data access and provide valuable insights through the Revenue Dashboard. Using the AI Assistant, users can quickly find the required information, ask questions in the natural language, and receive intelligent suggestions. The AI Assistant supports users to make quicker, more informed decisions, helping them enhance their business strategies and improve operational efficiency.

This section includes the following topics.

- [Accessing Cloud Data Assistant through AI](#)
- [Starting a New Chat](#)
- [Managing a Chat Thread](#)
- [Renaming a chat](#)
- [Deleting a chat](#)

Accessing Cloud Data Assistant through AI

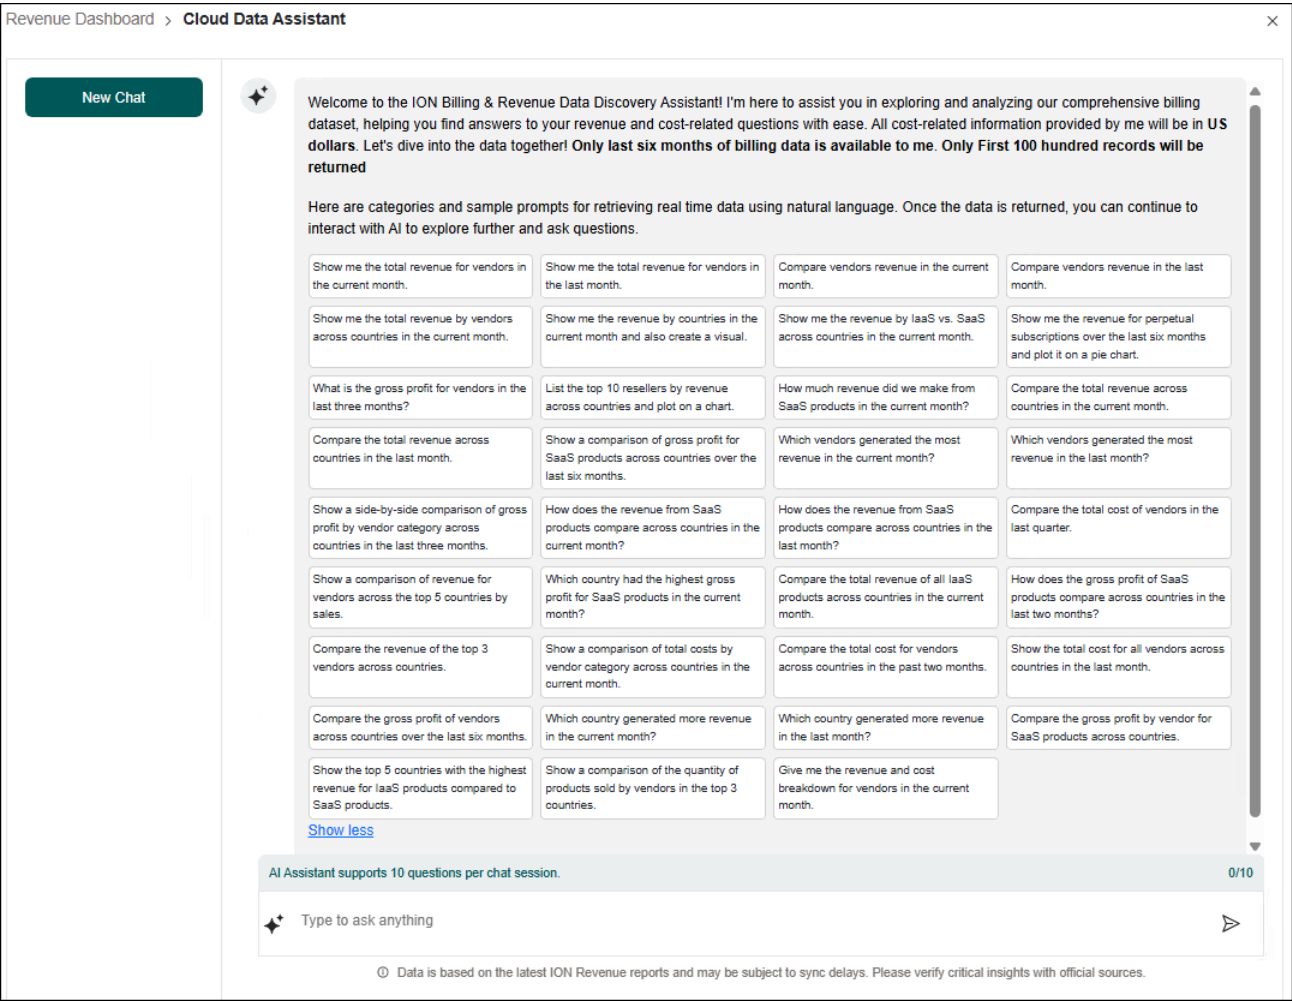

- To access the **Cloud Data Assistant** dashboard, on the **Revenue Dashboard** page, at the top-

right, click the AI Assistant  icon.

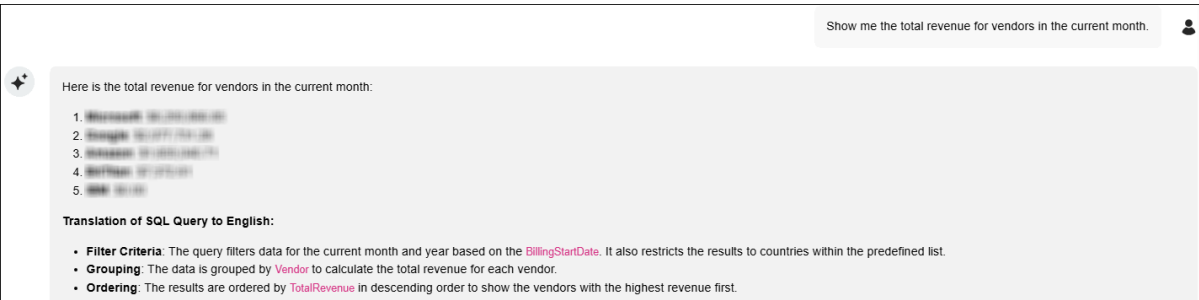

Note: The AI assistant icon is restricted for some users. To obtain access, you must create an EasyVista ticket.

The **Cloud Data Assistant** dashboard is displayed.

- On the right pane, you can view a welcome message and sample question prompts relevant to the Revenue Dashboard.
- The AI assistant automatically displays relevant data when you click a sample question prompt.

- You can also type your own questions into the AI Assistant to get personalized responses based on the Revenue Dashboard data.

AI Assistant supports 10 questions per chat session.
0/10

Type to ask anything

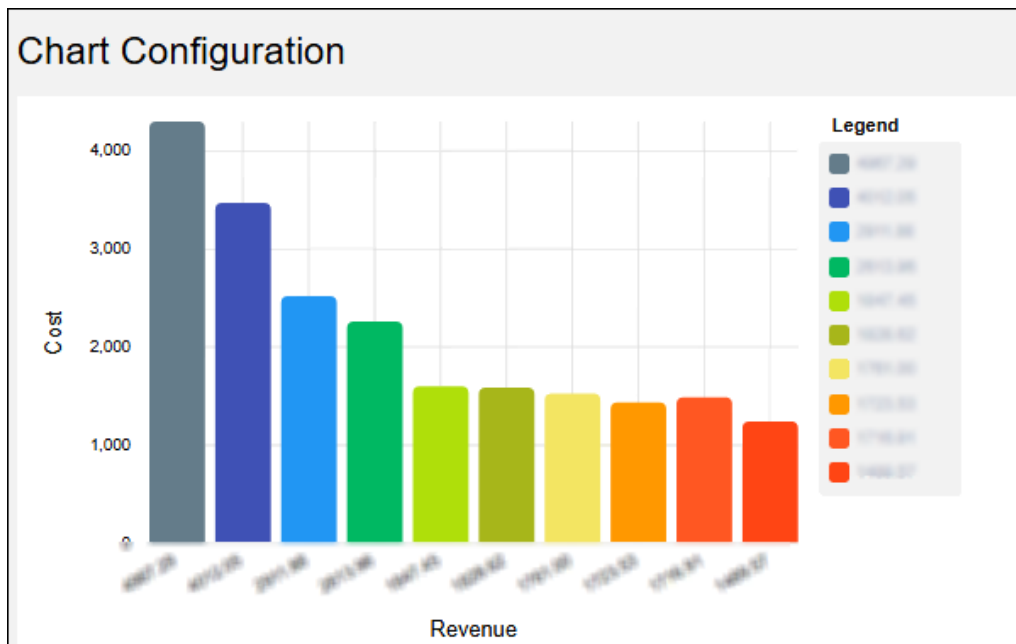

Data is based on the latest ION Revenue reports and may be subject to sync delays. Please verify critical insights with official sources.

- You can ask the AI Assistant to generate a tabular comparison of revenue details for vendors, according to your query.

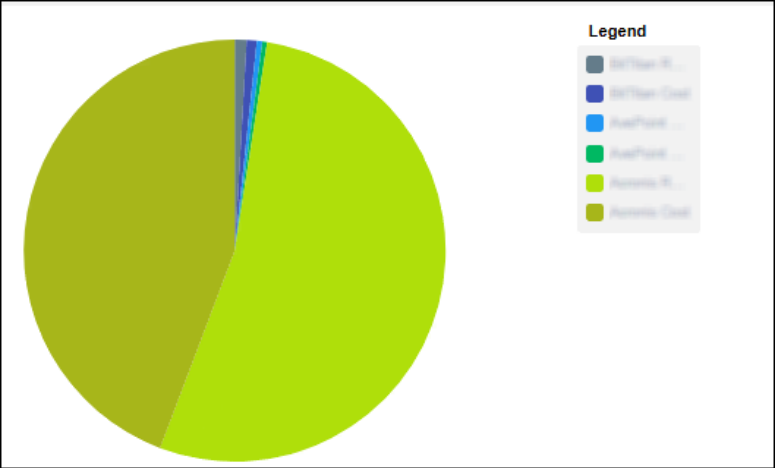

Here is the comparison table for the vendor BitTitan, showing the revenue and cost for each transaction:

Revenue (USD)	Cost (USD)
1687.26	1598.46
1671.06	1688.51
2071.86	2174.05
1671.86	1598.46
1687.46	1598.46
1688.02	1688.51
1701.86	1674.06
1723.02	1688.51
1748.91	1688.51
1688.02	1598.46
1671.06	1677.05
1688.02	1598.46

- You can ask the AI Assistant to generate bar graph details for various vendors, according to your query.

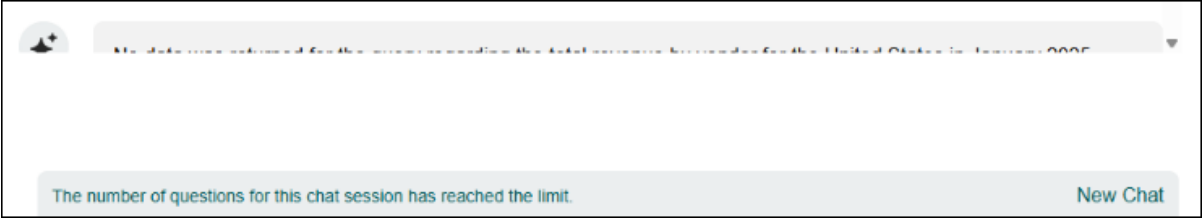

- You can ask the AI Assistant to generate pie chart details for various vendors, according to your query.

Note:

- You can ask 10 questions per thread and the chat count is displayed above the chat box.
- Exceeding the limit of 10 questions, hides the chat input box, and displays a message stating *"The number of questions for this chat session has reached the limit"*, and provides new chat link.

Starting a New Chat

- To start a new chat, on the left pane, click **New Chat**.
A new session begins, and you can ask questions related to the Revenue Dashboard.

Revenue Dashboard > Cloud Data Assistant

New Chat

Welcome to the ION Billing & Revenue Data Discovery Assistant! I'm here to assist you in exploring and analyzing our comprehensive billing dataset, helping you find answers to your revenue and cost-related questions with ease. All cost-related information provided by me will be in **US dollars**. Let's dive into the data together! **Only last six months of billing data is available to me. Only First 100 hundred records will be returned**

Here are categories and sample prompts for retrieving real time data using natural language. Once the data is returned, you can continue to interact with AI to explore further and ask questions.

- You must wait for the current response to be completed before sending a new request. If you send the next message while the current request is in progress, the following message is displayed: "Wait till the current request completes to send another".

Wait till the current request completes to send another. ✕

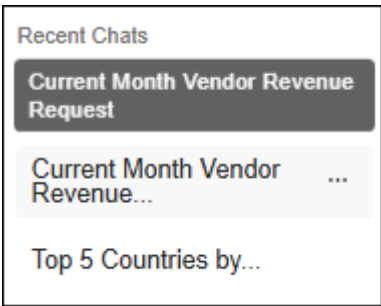

Note: Data restrictions vary according to the country and region.

Managing a Chat Thread

- Under the **Recent Chats** section, the system displays the chat history as a thread with summarized title.

- Hovering over a chat displays chat title.

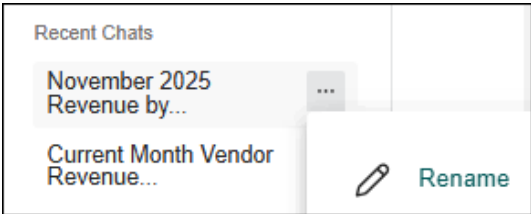

- The system places chats from the past 10 days in the **Recent Chats** section and moves the older ones to the **Older Chats** section.

Renaming a chat

You can rename chats from the history.

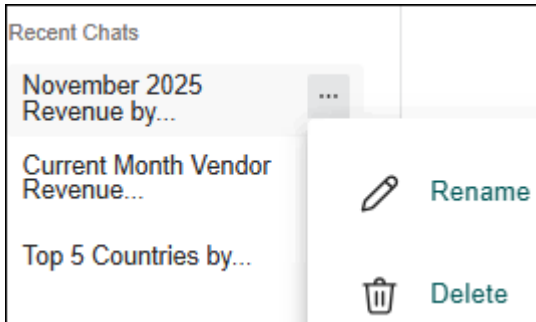

- To rename a chat, click the three-dots  icon next to the required chat, and then click **Rename**.

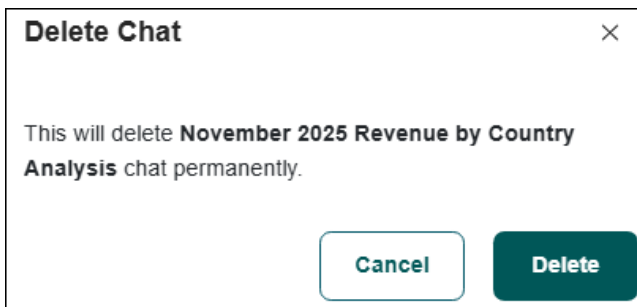

Deleting a chat

You can delete a chat from the history if it is no longer required.

1. To delete a chat, click the three-dots  icon next to the required chat.

2. Click **Delete**.
A confirmation message is displayed.

3. Click **Delete**.
The system permanently deletes the chat.
